

Secondary Cities – Kharkiv, Ukraine
Future Research Planning Worksheet

1) Project Purpose: What is your research question or what community issue do you want to address?

2) Project Results: What are the intended project outcomes? *(What do you hope to do with the data, analysis, and results? Who will you share them with? How might they be used?)*

2) Data to Collect: What type of data do you need to collect to answer this question or address this issue? What type of attributes do you need to collect?

3) Existing datasets: What existing data for Kharkiv can you use with this new data to help address the research question or community issue? _____

4) Data Collection Tools: What specific data collection tools do you suggest using for this project?

5) Data Analysis: What data analysis tools, methods, or software platforms do you think you would use for this project? _____

6) Data Collection Methodology:

- A. Who will be collecting the data? _____
- B. When will you collect the data? _____
- C. What is your study area, where are you collecting data? _____
- D. What is your estimate for time needed to complete data collection? _____

7) Project Management: Who will oversee the project? _____

8) Reporting Results: What potential ways will you report or share the results of this project with communities of interest? _____

9) Broader benefit of project data: By sharing this data with others by posting on the GeoNode or via other outlets, how might others be able to use this data for additional research projects or community issues?
